ICT IN EDUCATION

Teaching & Learning

Management & Administration

Planning & Decision Support

Integrated E-Learning and Educational Management Solutions

COMMON OBJECTIVES & CHALLENGES

Application and Integration of ICT into Education

Effective integration of ICT in the daily lives of people, to realize the benefits of technology.

Provide for Equal Opportunity in Education, and Lifelong Learning

Ensure effective integration of all people in the society regardless of age, gender, profession, etc.

Access to Learning Material (Standards-Based Content)

Standards-based content that is linked to national educational objectives and learning outcomes.

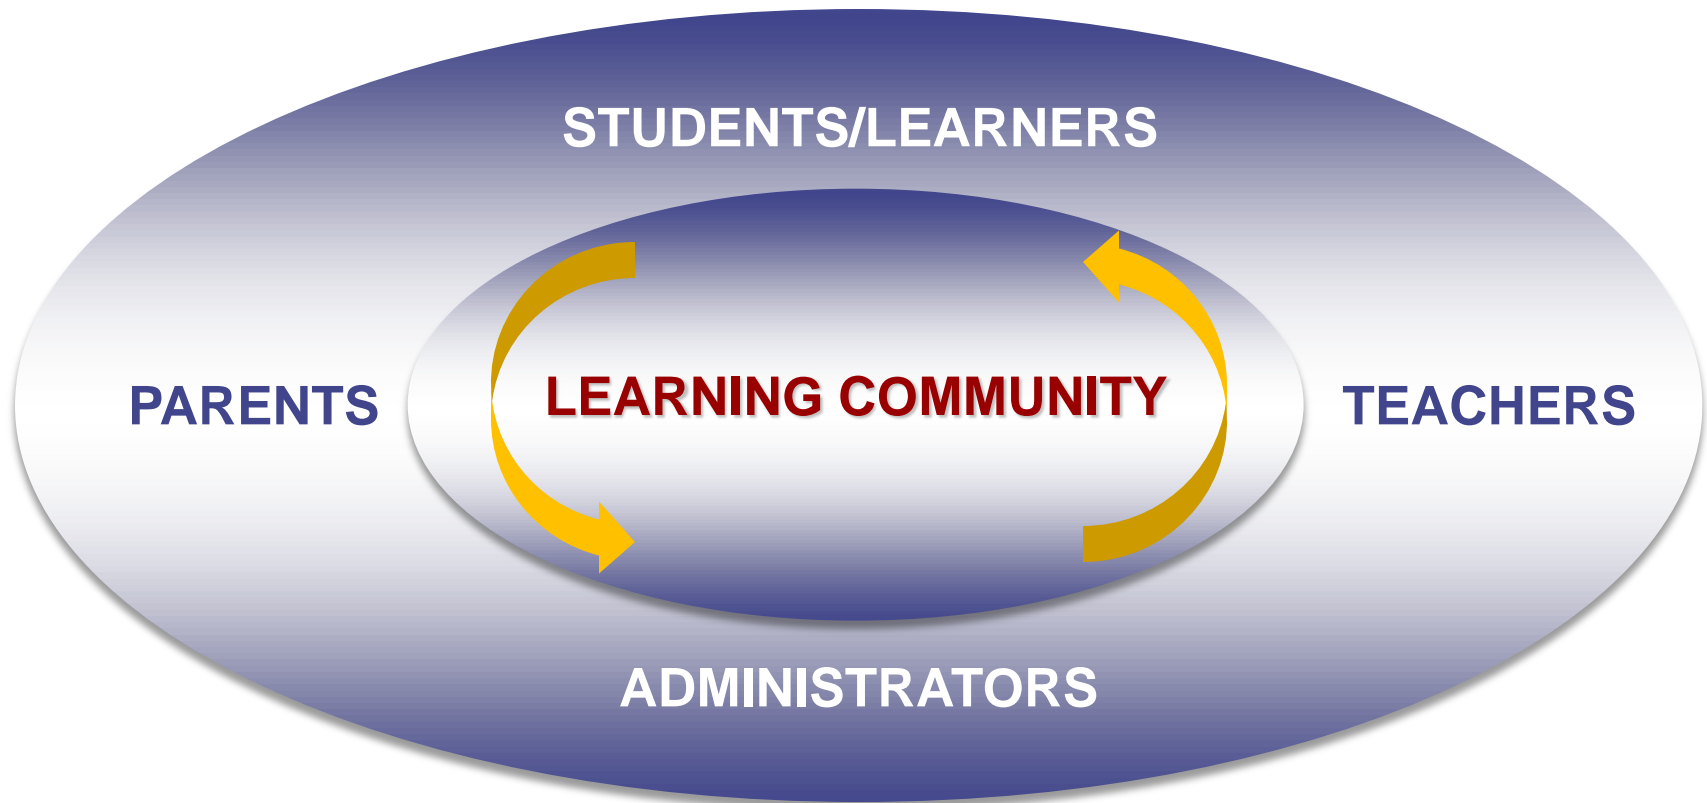

Capacity-Building, Teacher Training and Professional Development

Build proper capacity to ensure sustainability of educational reform programs and applications.

Proper Planning and Decision Support (EMIS)

Availability of real live data and utilization for analysis, planning, policy making, and decision support.

STAKEHOLDERS IN THE LEARNING COMMUNITY

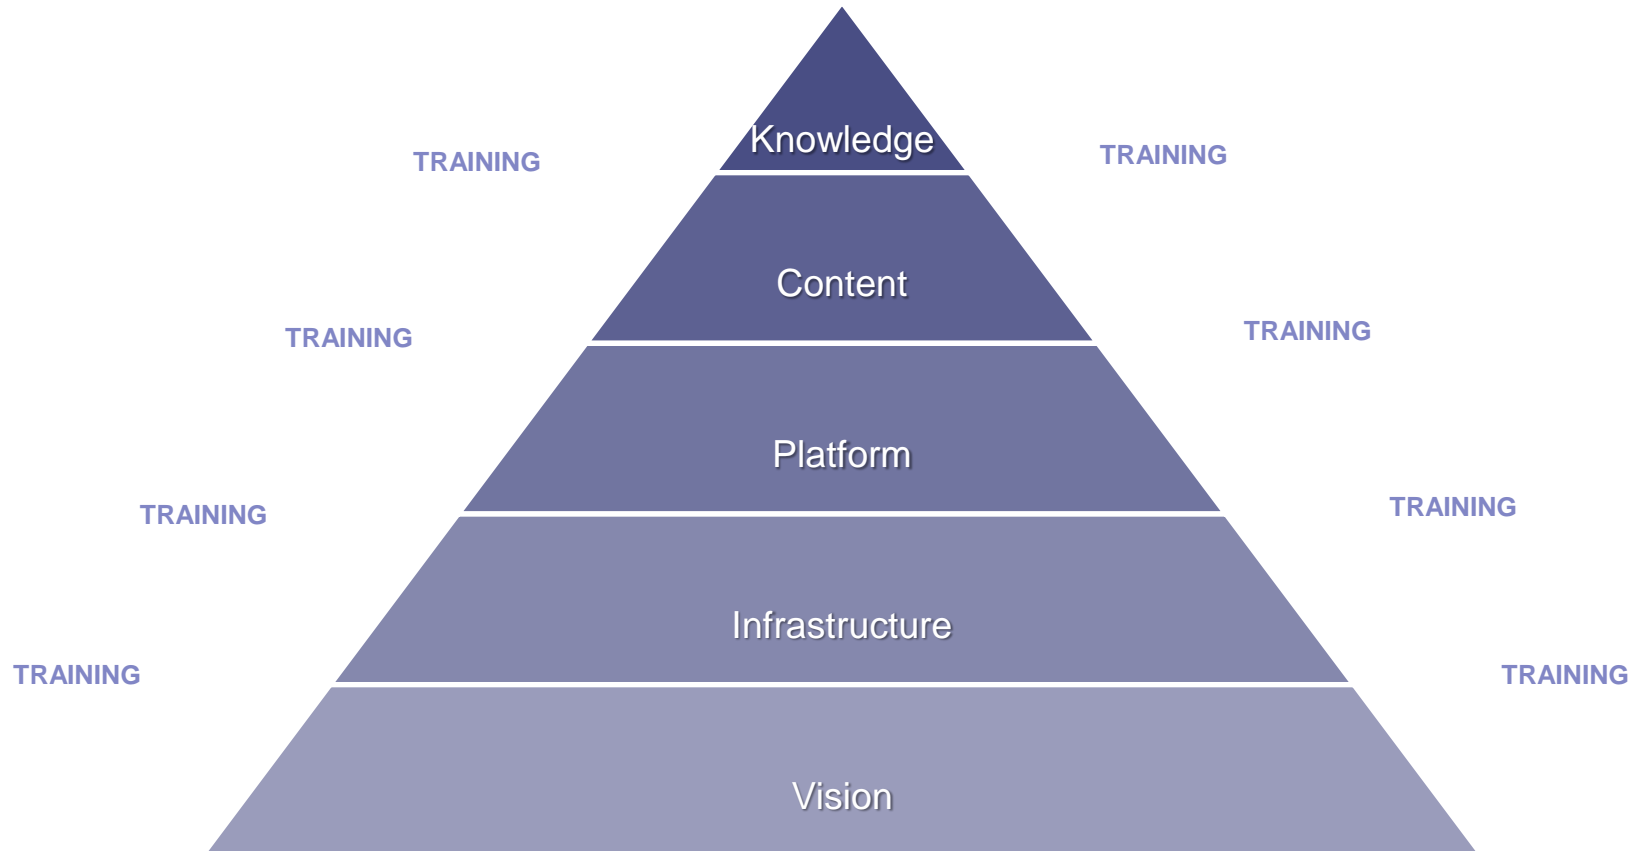

SUCCESS FACTORS

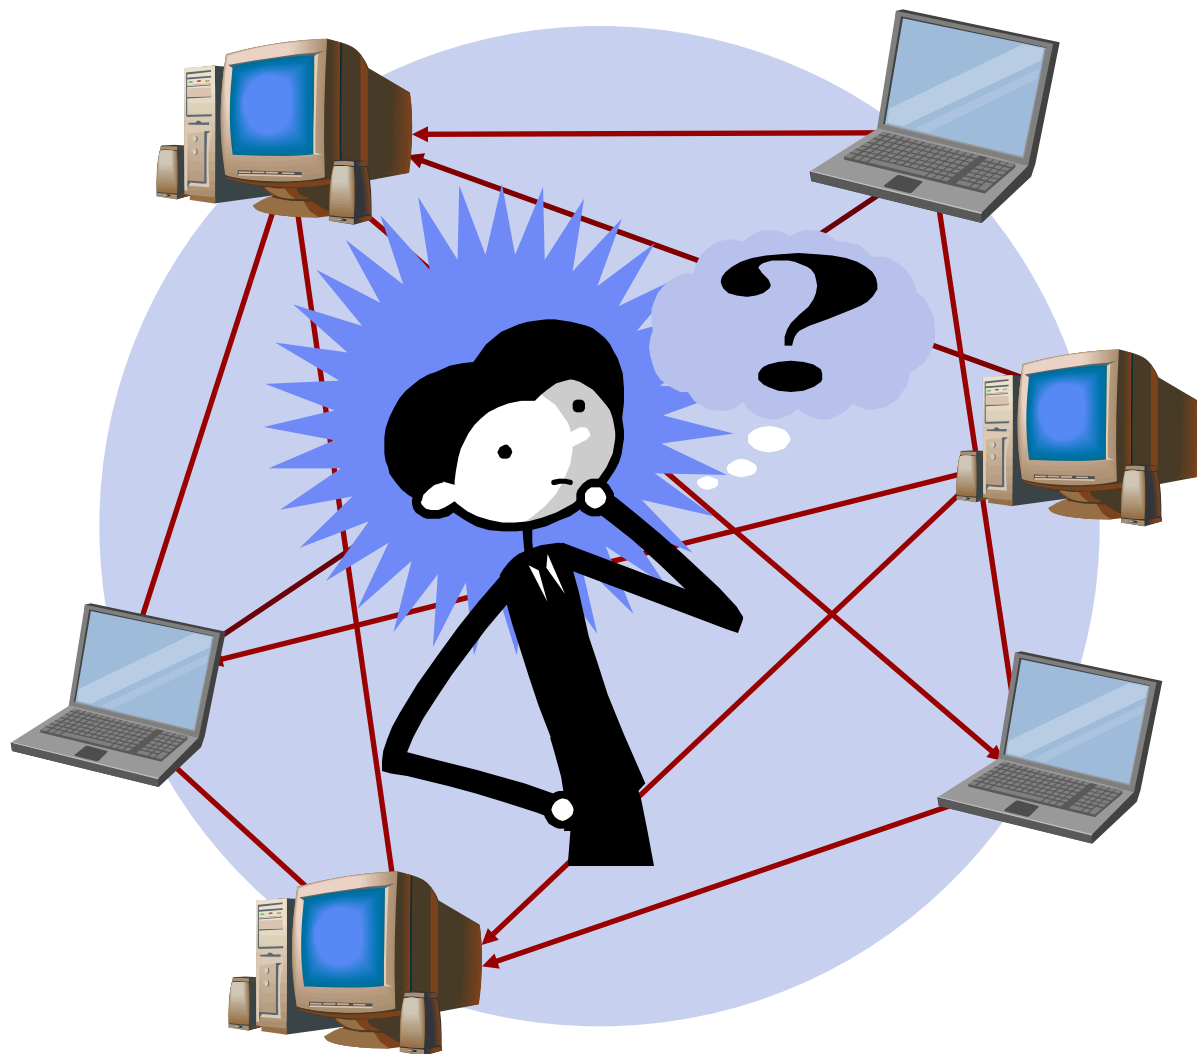

Fundamental Issues:

- ◆ The benefits of ICT in Education must always be remembered.
- ◆ E-Learning will not, nor should it, replace the teacher.
- ◆ Technology is only a tool, but a very powerful one. E-Learning is about the effective integration of technology into education to enhance the teaching/learning process.
- ◆ Stakeholders in the learning community are all potential learners.
- ◆ Access the right information (relevance), from any place at any time.
- ◆ Learning Outcomes must be integrated within the learning process.
- ◆ Interaction, communication and collaboration are most significant to the teaching/learning process.

THE KNOWLEDGE-TECH PYRAMID

Integrated E-Learning and Educational Management Solutions

Integrated E-Learning and Educational Management Solutions

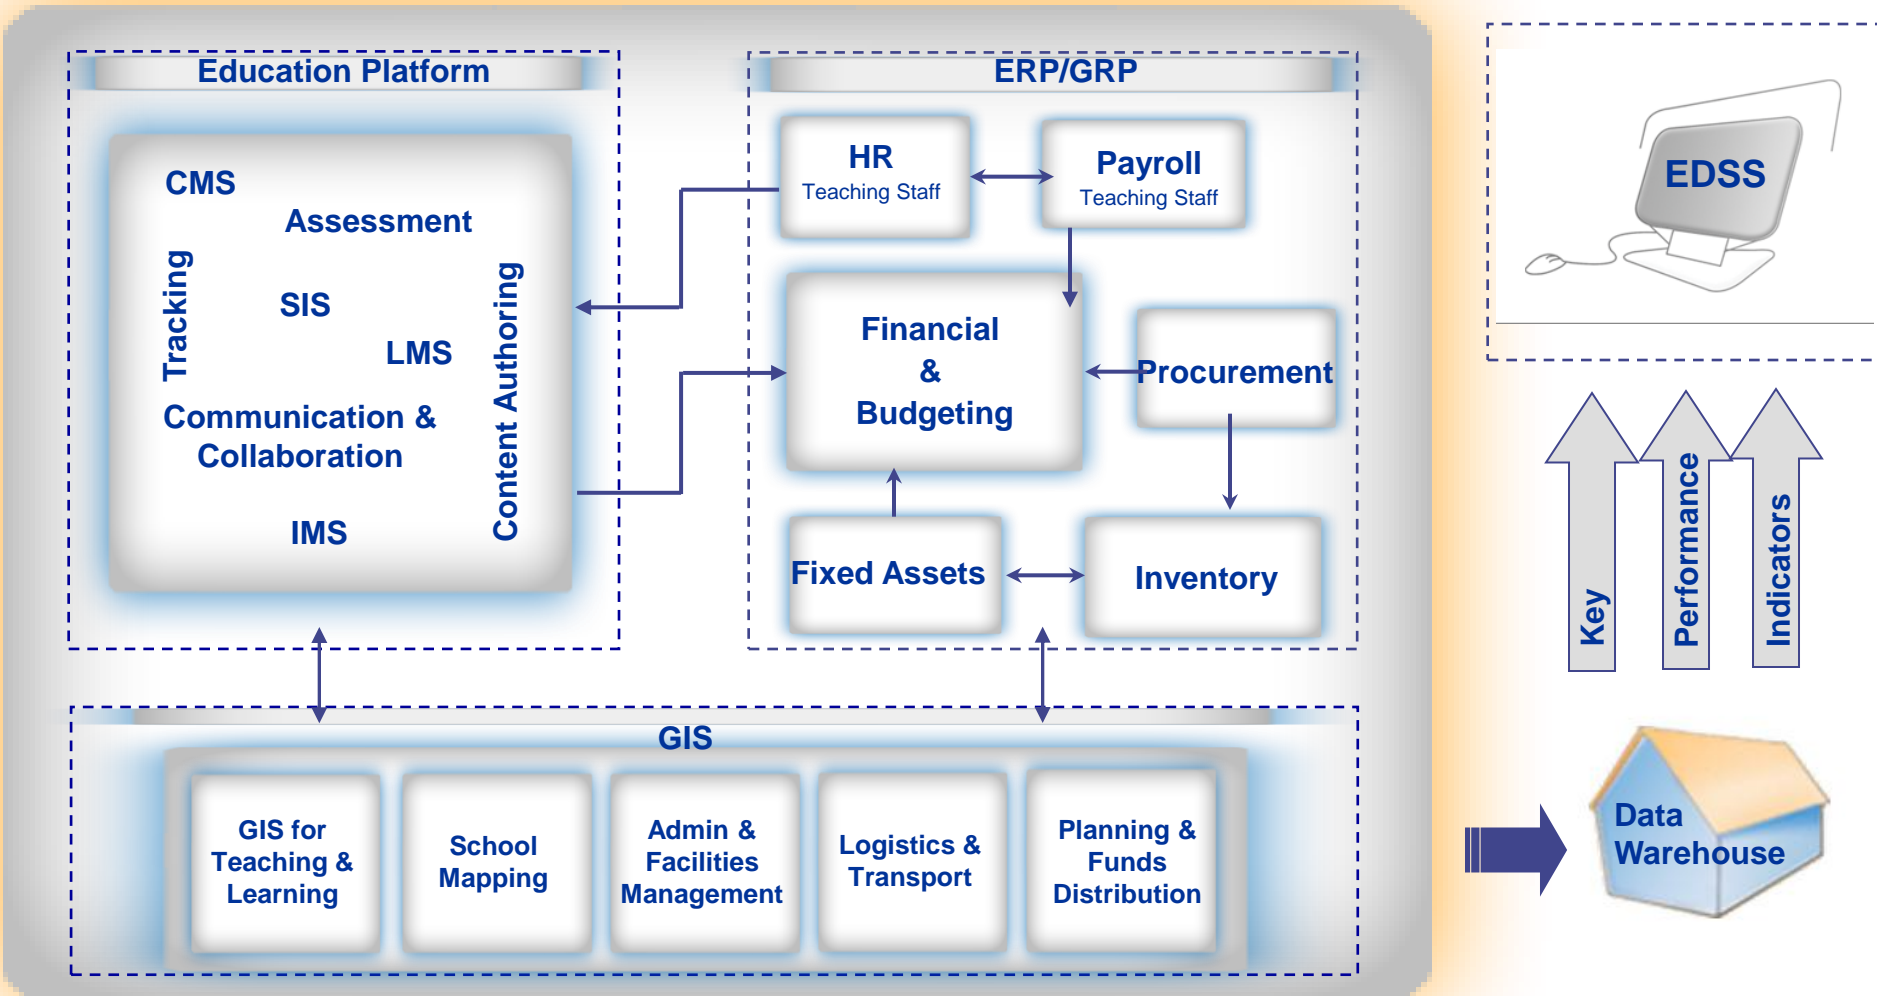

SUCCESS FACTORS

A comprehensive **Education Platform** that addresses all stakeholders, must be in place, as the main **management and delivery system** for content and other integrated learning and management tools and resources.

EDUCATION PLATFORM

1. **Comprehensiveness:** Seamlessly integrated
2. **Accessibility:** Learning anytime & anywhere
3. **Ease of Use**
4. **Communication & Collaboration Tools:** Collaborative learning community
5. **Authoring & Professional Development Tools:** Teachers
6. **Assessment, Evaluation & Tracking Tools:** Individual progress
7. **Content Delivery & Management Tools:** Sharable content, industry standards
8. **Learning Outcomes**
9. **Flexibility, Scalability, Security**
10. **EMIS, Reporting & Decision Support Tools:** Admin & policy makers

Education Management Information System

ICT IN EDUCATION

...It is all about PEOPLE

TECHNOLOGY

TRANSFORMS *the dynamics of the educational enterprise...*

CHANGES *the roles of students, teachers, admin and parents...*

CONNECTS *learners to a world beyond their immediate environment...*

***Ordinary People, Seeking
Extraordinary Knowledge...***
